G. O. P. REINS TURNED OVER TO MR. HOOVER

Nominee Takes Leadership of Republicans Through Call on President

DAWES PLEDGES AID TO PARTY'S TICKET

Vice-President Acts as Host-Crowds Greet Special Train Along Route

BY A STAFF CORRESPONDENT SUPERIOR, Wis .- Herbert Hoover, Republican presidential nominee, paid his respects to the man who has been the titular leader of the Republican Party for six years and by

that act took over the responsibility and authority of that command.

In breaking into his transcontinental tour to come to the summer White House to greet President Coolidge, Mr. Hoover did more than to submit in person his request to retire from the Cabinet.

He gave up the post so that he could assume the rank to which the Kansas City convention had raised im-the nominee of the party and its chosen leader.

Titular Head of Party

From now on within the Republican Party he will be turned to and his word will decide.

As Mr. Coolidge relinquished to Mr. Hoover the reins of command Vice-President Dawes pledged his aldepot in Chicago and took thm to many parts of central Europe. his home in Evanston for a three

hour visit.
There, within the hearing of Mr. Hoover, he told assembled newspa-

shaded, lake-horizoned veranda of the pre-convention contest in which the two men had been on opposing sides. Mr. Hoover had won and General

him his active support. Prosperity as an Issue

But there was more than that, significant and important as it was. General Dawes, who was considered a candidate for the nomination on an issue on which he differed emphatically with President Coolidge and Mr. Hoover, the equalization fee, declared the question on which the people would settle the election was

Coolidge policies.

Gets Enthusiastic Welcome

Mr. Hoover's reception in Superior was the largest and most enthusiastic he has received on his tour so He was met at Janesville, Wis., by Gov. Fred R. Zimmerman, who accompanied him as far as the State capital Madison, Governor Zimmerwho is a candidate for re-election, has come out for Mr. Hoover. Walter J. Kohler, another candidate for the Republican guberna-

torial nomination in Wisconsin and who has announced his support of Mr. Hoover also, joined the train, riding from Chicago to Madison

Both Governor Zimmerman and Mr. Kohler conferred with Mr. Hoover and his advisers.

Irvine L. Lenroot, former Senator from Wisconsin, headed the White House staff that greeted Mr. and Mrs. Hoover upon their arrival in Superior. The entire party including city officials and leaders of the regular Republican faction in the State, took part in a parade through the city.

Go to Brule Camp

Getting into automobiles the Hoover party then sped through the White House on the Brule River. There he and Mrs. Hoover welcomed by President and Mrs. Coolidge. They will be guests of the

President for two days and then resume their journey to California Through Ohio, Indiana, Illinois, and Wisconsin Mr. Hoover was met by state and local leaders. He was assured that the outlook for his elec-

tion was good. In Indiana, where he opposed James Watson, Senator from Indiana, for the delegates from that state to the National Convention, he was met with a message from Senator Watson that he would take the

Protestants Urged to Preserve Unity

Sunday School Workers Told Europe Needs It to Rout Skepticism of Youth

BY A STAFF CORRESPONDENT LOS ANGELES, Calif.—The saving, of intellectual life in Europe is the problem of European Protestantism, Dr. James Kelly of Glasgow, non-Hoover party then sped through the orary secretary of the British Sun-day School Association, declared at the World's Tenth Sunday School Convention, now in session here.
"As a result of the war," Dr. Kelly

continued, "many church bodies have lost all corporate unity, and political conditions have become a serious menace. Only a united Protestantism can help the situation, which represents a crisis that is giving rise to skepticism in the thoughts of the younger generation."

Arthur Black, a member of the British committee at the convention, declared that Herbert Hoover and Woodrow Wilson are the Americans most beloved throughout Europe for their aid of oppressed nations. He expressed the hope that his audience, mposed of representatives of many nations, "express its sympathy to the next dry President of the United States, which has always been a

SOVIET RESCUER

Off in Safety

MOSCOW (A)-The Russian aviator and pilot Chukhnovsky and his ens, seemed more lovely than ever, four companions, who were marooned by a forced landing near drama, "The Song of Hiawatha," was Cape Platen on July 12, were taken aboard the Russian ice-breaker Krassin at 10 p. m. Sunday. News of the safety of the party came by radio from Professor Samoilovitch.

The Krassin is now pounding its way toward Advent Bay to fill up her bunkers with coal in preparation for further search for the mising Amundsen party and the six men carried off in the balloon of the Italia on May 25. After coaling at Advent Bay, the nearest port, the Krassin will press its search for the 12 men who are still swallowed up

Italia Wreck Described

The wreck of the Italia, as doscribed by the rescued men aboard the icebreaker Krassin to a correspondent for Taas, the Soviet news agency, was caused by a heavy layer of ice which covered the dirigible and made maneuvering impossible.

The rescued men told the correspondent that everything went well until the balloon and its propellers became heavily encrusted with ice. The dirigible suddenly tilted and caused the catastrophe far from and Baron von Huenefeld, the Bremen Atlantic fliers. They were the Italia worked well throughout shore. The mechanical appartus of and all the motors functioned until

the crash. and the free bag of the dirigible then rose to a great height and was carried off by the wind a consider-This took place about half an hour after the crash.

Despite the catastrophe and the danger in which the party had been placed, Prof. F. Behounek, Czechoslovakian meteorologist, continued his research and scientific study.

Chukhnovsky, who came into prominence early last week by a brilliant air reconnaissance during which he sighted Capt. Alberto Mariano and Capt. Filippo Zappi, members of the walking party of the Italia, gave the first news to the world of these men, who had been Rapidly changing social and eco- | sional bondsman and a lawyer to defend him. SMITH-WHITE CONTROVERSY AT STANDSTILL

Governor Refuses to Enlarge Upon Reply to Kansan's Attack on Record

Gov. Alfred E. Smith has declined for the present to enlarge upon his reply to William Allen White's declaration that he consistently voted in the New York Legislature against restricting liquor sales, gambling and vice, and that "his election would nenace the Nation.'

Beyond charging that the Kansas editor based his statement on false nformation furnished by the Rev. O. R. Miller, superintendent of the New York Civic League and denying that he had voted against Sunday closing of saloons or bills to curb gambling and commercialized vice, the Democratic nominee for President has refused to go.

Even a fresh attack by Mr. White and his statement that he never heard of Mr. Miller and obtained his information from New York news-papers, failed to move the Governor to answer the charges against him more specifically.

Expected to Answer Later

In the opinion of political observ ers Governor Smith will find it necessary when the campaign gets actively Special to The Christian Science Monitor under way to take up his record in his attitude on the regulation of the liquor traffic. He has himself made much of the attack upon him will center on his legislative record.

THREE NATIONS HAVE APPROVED KELLOGG PLAN

France and Italy Join Germany in Acceptance of Pact Proposal

GREAT BRITAIN IS TO FOLLOW SUIT

Spain Also Reported as Regarding Anti-War Treaty With Favorable Eyes

WASHINGTON-France, hitherto the most hesitant nation in the negotiations looking to the renunciation of war, has accepted the Kellogg treaty proposal. An Italian acceptance cabled by the Premier, Benito Mussolini, was received simultaneously with the French. Aristide Briand in his note handed to the United States Ambassador in Paris, Myron T. Herrick, made it clear that the French acceptance was due to the These interpretations coincide closely with the French reservations but are not included in the text of the treaty.

After a careful reading of the French and Italian notes, Mr. Kellogg said that he found them both to be very satisfactory.

WASHINGTON (A)-The proposed treaty of the Secretary of State, Frank B. Kellogg, for the renunciation of war bears the approval of

To add to the gratification of ready to approve the treaty and might dispatch a note to that effect some time this week. Spain, too, was said to look favorably upon the

American proposal.
Including Great Britain and Spain, replies from 11 countries have yet to be received. A draft of the proposed treaty and Mr. Kellogg's note of interpretation were dispatched on June 23 to 24 nations, including the British dominions at the suggestion of the London Government and Belgium, Czechoslovakia and Poland at

the suggestion of France.
Under the Proposed treaty, the signatory nations would renounce war as an instrument of national policy and agree to use only pacific means in seeking a solution for whatever disputes might arise between them, regardless of their character or ori-gin. Further, should the pact be violated, all parties to the covenant would be freed automatically of their obligations thereunder to the treatybreaking state.

Text of French Reply The French note signed by Aris-

Mr. Ambassador: By your letter of June 23 last Your Excellency was good enough to transmit to me a revised text of the draft treaty for the renunciation of war, accom-panied by the interpretations given

by the United States. I beg you to convey to the Government of the United States the interest with which the Government of the Republic has taken cognizance of this new communication which is suited to facilitate the signature of the treaty whose successful conclusion is equally close to the hearts of the French and American nations.

First of all it follows from the new preamble that the proposed treaty indeed citing at the proposed

treaty indeed aims at the perpetu-ation of the pacific and friendly re-lations under the contractual con-ditions in which they are today established between the interested nations; that it is essentially a question for the signatory powers of renouncing war as an instrument of their national policy and also that the signatory power, which hereafter might seek by itself resorting to war to promote its own national interests, should be denied the benefits of

Agrees to Stipulations

The Government of the Republic is happy to declare that it is in accord with these new stipulations. The Government of the Republic is happy, moreover, to take note of the interpretation which the Gov-ernment of the United States gives to the new treaty with a view to satisfying the various observations which had been formulated from the French point of view.

These interpretations may be re-sumed as follows:

Nothing in the new treaty restrains or compromises in any manner whatsoever the right of self-defense. Each nation in this respect defense. Each nation in this respect will always remain free to defend its territor's against attack or invasion; it alone is competent to decide whether circumstances require recourse to war in self-defense.

Secondly, none of the provisions of the new treaty is in opposition to the provisions of the Covenant of the League of Nations nor with those of the Locarno treaties or the treaties of neutrality.

Moreover, any violation of the new treaty by one of the contracting parties would automatically release the other contracting powers from obligations to the treaty-breaking state.

obligations to the treaty-breaking state.

Finally, the signature which the Government of the United States has now offered to all the signatory powers of the treaties concluded at Locarno, and which it is disposed to offer to all powers parties to treaties of neutrality as well as the adherence made possible to other adherence made possible to other powers is of a nature to give the new treaty in as full measure as can practically be desired, the character of generality which accords with the views of the Government of the Re-

Compatible With Obligations Thanks to the clarification given by the new preamble and thanks,

moreover, to the interpretations given to the treaty, the Government of the Republic congratulates itself that the new convention is compatible with the obligations of existing treaties to which France is the wife a contraction when the state of the st otherwise a contracting party and the integral respect of which is

At the moment of thus assuring its contribution to the realization of of a long matured project, all the moral significance of which it had gauged from the beginning, the Government of the Republic desires to render homage to the generous spirit in which the Government of the United States has conceived this new manifestation of human fraternity which eminently conforms to the profound aspirations of the French people as well as of the American people and responds to the sentiment more and more widely shared among peoples of international solidarity.

Text of Italian Note

Text of Italian Note The Italian note signed by Benito Mussolini read as follows:

Excellency: I have the honor to Excellency addressed to me under the date of 23 of June last and to ask Your Excellency to inform your Government as follows:

The Royal Government, which thas attentively examined the last draft of a treaty for the elimination of war proposed by the United States, takes note of and agrees with the Interpretation of the said treaty which the Government of the United States sets forth in the above-mentioned note of June 23, last, and on this premise declares that it is disposed to proceed to the signature thereof.

I am happy to take this occasion

SOCIALISTS TO UNITE ON RHINE FREE OF TROOPS

German Position Strengthened by French Party Vote at National Congress

BY CABLE FROM MONITOR BUREAU PARIS-Evacuation of the Rhineland-or at least of the second or Coblenz zcne-becomes highly prob able before many months have passed as the result of a decision Italy Willing of weighty international importance, taken by the French Socialists at their national congress, which has

just been concluded here.

The congress met in part to sound the opinion of the Socialists of France, so that the delegates to the Socialist international conference, which meets in Brussels on Aug. 2, might be properly instructed.

Socialist Speaks for France The attention of all the Socialists at the gathering at Brussels will be focused on no question of more immediate international interest than this problem of Rhineland evacuation. What gives special point to this fact is that the German delegation will come straight from Germany, which has recently accepted a "Left" gov-ernment and which has for its Chancellor a Socialist leader. Hermann Müller has already emphatically demanded the "immediate evacuation"

of the Rhineland. Obviously Germany's position has been strengthened by this vote of the French Socialists. At their congress still another move of primary significance in this matter was made.

After a discussion which split the party, the majority voted in favor of the most eminent member, M. Paul-Boncour, retaining his place as first among the delegates of France at the League of Nations.

Drift Toward the Left

The purists felt it was illogical that a Socialist should speak for the French Government at a time when the Socialist Party is in parliamentary opposition to the Government. The majority, however, felt that M. Paul-Boncour's post gave the party prestige and at the same time al-lowed him opportunities to help shape the Government's views. It is this latter interpretation which the Germans value, for whenever the Foreign Minister, Aristide Briand, is unable to attend the Geneva meeting

M. Paul-Boncour takes his place. Despite the French elections being won by groups of the so-called Right, Germany has watched sympathetically M. Poincaré's seeming drift toward the Left lately. Hence the maintaining as M. Briand's righthand man of M. Paul-Boncour-the leading member of the party pledged to the Rhineland evacuation—must give Germany added hopes of an early withdrawal of allied troops from the Rhineland, since it is inferred that he is bound to bring pressure on the Government tending in this direction.

Pirates' Ship Ahoy!

Buccaneering Loses Charm as Craft Reaches Mud Flats and Rescuer Gets Stuck

SPECIAL FROM MONITOR BUREAU NEW YORK-Buccaneering is not what it used to be. When Morgan sailed the Spanish Main and Lafitte established his pirates' rendezvous in Barataria Bay there were no

corner to rescue them if their ships Things are different now. Jerry Valentino and Robert Batterson, both of whom have several years to go before they reach their 'teens, will testify that high adventure can come to a low end. They know, for they have been pirates, although their

swashbuckling careers lasted but a The night was dark, as good buc-caneering nights usually are. • So they took a wooden bedspring, christened it for a real galleon and set sail in Coney Island Creek. They were sure that the gold-laden ramparts of Cartagena were not far distant and that the buried treasure of Corker Cay was as good as found by them. And when they were through with that there was more buccaneering to be done on the island of Ja-

But they didn't even get to Jamaica, Long Island. Their navigation concerts. It is under direction of failed to take into account the mud Albert Stoessel, who is also super-Island Creek barely cover. One end of the Chautauqua Institution in the of the raft stuck, and it turned over.
Robert, being the commander of of Boston.

the expedition, obeyed the marine precedent of sticking to the ship. Jerry tried to swim to shore, but got stuck in the mud. It was then that their cries were heard by James Hennessey, a New York fireman who was home on leave, and sitting on his front porch.

front porch.

Pirates have no terrors for the New York Fire Department. Mr Hennessey swam out to Jerry, but he, too, was unable to extricate him self from the mud, once he got stuck in it. He added his lusty cries to the shouts for aid and another neighbor came to the rescue. Together they got Jerry ashore and returned to take Robert from the raft.

Buccaneering, they agreed, is not

to Renew Pact

Government Not to Denounce Treaty of Friendship With Jugoslavia

Y. WIRELESS TO THE CHRISTIAN SCIENCE MONITO ROME-Although no official information is yet available, it is generally believed in Italian diplomatic circles that if the Nettuno conventions are not ratified before July 27 the treaty of friendship between Italy and Jugoslavia, known as the pact of Rome, signed in January, 1924, will not be

lenounced by Italy.

It will be remembered that a protocol was signed last January, postponing for six months the date by which the pact of Rome must either be denounced or renewed. The Jugoslav Government has already presented the Nettuno conventions to the Skupshtina for ratification, but recent events in Jugoslavia, especially the prolonged ministerial crisis, will certainly render extremely difficult the Jugoslav Parliament's ratification of the conventions

press for immediate ratification of the conventions, and will consent to an extension of the term of the treaty for a further period if Jugo-slavia makes such a demand.

No such step, however, has yet been made, but it is understood that such action would receive the sympathetic attention of the Italian Government, which would thus give Jugoslavia proof of its sincere desire to establish cordial relations between the neighboring states.

Obregon 'Occupies'

President-Elect Differs From Former Scenes

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR MEXICO CITY-Another Mexican President-elect has entered Mexico City amid scenes of tranquillity and Coney Youths Sail executive. Gen. Alvaro Obregon on his arrival from his home in Sonora was accorded an enthusiastic wel-come by an orderly crowd estimated But if Dean West we at 25,000, which he addressed from the balcony of his headquarters.

He eulogized the working classes and declared "the middle class forms shouts of "viva Obregon."

General Obregon pleaded for the co-operation of all Mexicans for the co-operation of all Mexicans for the aggrandizement of Mexico during his it has been possible to hear the rich, six-year term, which begins Dec. 1.

"The masses have reposed their by working for the fulfillment of all my campaign pledges," he declared. He said his aim would be to establish a "moral, strong and legal Gov-ernment."

The welcoming crowd was composed largely of picturesque country folk garbed in white linen suits or blue overalls and wearing wide-brimmed straw hats. Before General Obregon spoke speeches were made by Aaron Saenz, formerly Secretary of Foreign Affairs and Obregon's campaign manager, and by Jose Luis Solorzano, president of the Chamber

Geographers Meeting at London Discuss International Map of 5000 Square Feet

BY WIRELESS FROM MONITOR BUREAU
LONDON—A meeting of the commission in charge of the compilation
of the "international map" was one BY WIRELESS FROM MONITOR BUREAU of the "international map" was one of the outstanding features in the deliberations of the world geographical experts now assembled here, prior to the opening of the main conference Mansion House at Cambridge.

The map, first mooted at a conference in Berne, was commenced in 1895, after a gathering in London that year had decided on a scale of one in a million, equivalent approximately to 16 miles to the inch, though actually the kilometer was used as the unit of measurement.

It is calculated that the completed

map spread out flat would cover an area of 5000 square feet. The underarea of 5000 square feet. The undertaking is so vast that though the smaller countries like England have already completed their allotted task, it is expected that at least another decade will be required before the map is finished, according to the Sunday Observer.

Two other maps are also in course of preparation under the auspices of the International Geographical Union, namely, an international map of the sky comprising some 500,000

of the sky comprising some 500,000 stars shown on 20,000 photographs supplied by observatories in 18 different countries and an international map for the use of airmen. The latter is on Mercator's projection, and will

and so far 30 countries are co-operat

ing to produce it.

His speech was Cleveland Tower something would frequently interrupted by cheers and be gone that should still be a part of Princeton

The Chair's Final Squeak

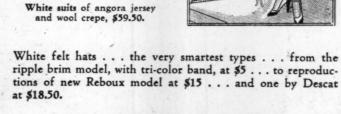

spondence in Dean West's office. He arrived there promptly at 10. Once there was a saying that if you stood in the corridor outside you could tell when he had arrived by the protesting squeak of its ancient office chair. But one day a student, through some peculiar mischance, or perchance an overwhelming absorption in the problem concerning a Later Latin thesis he fetched in to the dean to solve, flung himself into Dean West's chair instead of into the visitor's chair. Things went well for a time. But the student grew agitated, and suddenly the Dean's chair collapsed in small pieces on the floor. The Dean thumped his fist upon his desk and exclaimed with magnificent satisfaction, "Good! I've een hoping a long time to get rid of that old chair."

Perhaps if there were a poll, to see what tradition is strongest in the university chronicle, it would unanimously specify "Dean West." He is far more completely of Prince-ton than its emblematic tiger. He came there in 1870, a boy who liked to play the clarinet; with his arrival there was nothing to indicate that, in his time, he would perhaps exert a more diverse and brilliant constructive and efficacious power than any other single member of the

MERGER URGED IN NEW YORK'S TRANSIT PLANS

Reorganization and Unification Under Public Ownership Is Advised

SPECIAL FROM MONITOR BUREAU posed by Samuel Unternyer, special counsel to the Transit Commission.

Following a nine months' study, Following a nine months' study,

of the Brooklyn-Manhattan Transit cal miles west of Cape Arede. The Comporation, he has just issued another detailed plan for the adjustfor the Soviet flier Chukhnovsky and ment of the much-discussed transit situation. The plan substantially is near Cape Platen damaging their an elaboration of previous studies plane after having sighted Captain and recommendations which Mr. Un-

As a preparatory step to the broader aspects, Mr. Untermyer is believed to envisage the recapture of such portions of the Interborough as the city can acquire and by pur-chase of the Brooklyn-Manhattan Transit to merge these two lines into a component system, with inter-change between the two subways without payment of additional fare. The corporation controlling the lines would be a publicly owned one and its mortgage bonds would be given in exchange for the stock of the now independently owned subway lines. The directors would represent the public in so far as business men, appointed by the Mayor, could be considered to be free from

As a city-owned corporation, it is believed that the company could sell securities at lower rates of interest, and in order further to safeguard the financing, the Untermyer plan pro-poses that definite funds be set aside

to meet accruing interest charges.

As a final step to financial indeendence of the company on a low fare, the plan urges that the city assess property owners who would benefit by new lines constructed. Mr. Untermyer also has developed a plan for taking over the Interborough lines, should that company refuse to negotiate for sale of its property, most of which is leased from the

icebreaker Krassin is still searching | in the neighborhood of Brock Island Malmgren, the noted Swedish mete-

The Krassin was prevented by fog from searching to the east for six men who drifted away in the balloon part of the dirigible and turned its efforts toward finding the Swedish meteorologist. In some quarters it had been hoped that Roald Amund-sen and his five missing companions might be found with the balloon group. The chief of the Swedish rescue mission suggested that seaplanes were best fitted to continue the search for the 12 missing men.

The rescue leader said that Dr. Malmgren had been left on June 18 at a point six minutes north-north-east of Foyn Island without pro-visions. Brock, Foyn and Schuebeler Islands were searched by Captain Sora and the engineer Van Dongen with a dog team from June 27 to July 3 without finding Dr. Malmgren.

Then open water and drift ice around Foyn Island prevented further.

The Swedish chief said that an ice-breaker with the help of airplanes was the best fitted to search for the balloon group. He suggested that the Moth, Daimler and Fokker planes should be sent home with their crews.

The Christian Science Monitor 2 ADELPHI TERRACE

sorship as Peasants Become Less Aggressive

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR BUCHAREST - Appreciating the abnormality of a rigid censorship in a constitutional country, the Ruma- Capital Issues for May Prove nian Government, through its official organ, the Viitorul, has recently endeavored to justify this measure.

It says that the censorship is not maintained for the sake of the Government nor for the good of the Liberal Party, but for the best interests of the state and nation. It accuses the opposition press, which embraces almost all the papers in Rumania, of being unscrupulous and public order and progress. It also charges that the opposition papers, when left unchecked, continually report cases of alleged corruption, abuse and dissatisfaction, which countries hostile to Rumania use for their own advantages and to the disadvantage of the Rumanian people. Therefore, concludes the gov-ernment organ, full responsibility for the censorship in Rumania rests upon the opposition press, since it makes the people dissatisfied. People Need "Training"

Generally speaking, this is the attitude which the Liberal Party openly takes toward all political activity in Rumania. It thinks that for the good of the people the ballots of the people should be "controlled." It frankly considers that In the far East the outlook was betthe nation, made up largely of inexperienced peasants living for the most part in recently annexed provinces are not yet able to govern themselves. It is thought that they need a period of training, which the Liberal Party is giving by controlling the papers, elections, meetings, banks cultural activities. The Rumanian Government seems

to have adopted a more aggressive policy toward the National-Peasant Party. Not only has the censorship of the press become appreciably more drastic, but within the last few days police officials have searched the headquarters of the party in the cities of Braila and Galatz. In the latter place a whole issue of a National-Peasant paper was confiscated and a large quantity of printed appeals seized. It is stated that the appeal contained instructions for the party members as to how they can put into application the decision of the "National Assembly at Alba Julia" to treat the present Government as an enemy of the nation and also a suggestion to the effect that if the Regency continues to support the present Government it will have to be treated in the same way.

Peasants Less Active The author of the manifesto was ordered to appear before the court, ecutive committee of the party, con-sisting of 100 members, assumed responsibility for the authorship and refused to divulge who actually drew up the manifesto, the court finds itself in a difficult position.

This policy activity has provoked much comment, though the situation seems to be less strained than about the time of the convention at Alba Julia. There has been a slump in the aggressiveness of the National-Peasant Party. The Government professes to feel very secure.

The Case for Quicker Justice

(Continued from Page 1)

he remained firm in the face of the test of his manliness, which the faulty legal system imposed.

When the magistrate finally heard the evidence it was all over in a again. The Italian still hung on, minute. There was no question though the case had cost him more about the guilt. The Italian sighed with relief. He thought the affair was settled at last. He did not realize the sands of dollars. And at last Eddie place that the municipal court plays was really convicted and sent to in legal affairs in Chicago, as in other American cities.

This court sifts the cases offered by the police department, tries only misdemeanors and sees if there is sufficient evidence in more serious cases to turn them over to a grand jury. Following the seventh delay, the municipal magistrate determined that there was evidence in this case, and the matter went up to the next

rung of the legal ladder.

The grand jury got Eddie's case. The grand jury is frequently referred to as a relic of the past, useful in some instances, but with most of its original purpose of hearing secret charges long outlived. It gave per- in other cases where tactics are functory approval to the charge, returned an indictment, and the case was set for trial again, with all the capes his merited punishment altoprevious effort to be duplicated. The Italian rubbed his hands, however, with his hope restored. From now on it would be simple, he supposed.

The day for trial came; the judge that in any other large country. rapped with his gavel-but where was Eddie and his lawyer? Not present. The judge promptly ordered bail forfeited and went on with the next

Recent surveys show that much collateral that is now accepted is erts a strong influence on the public practically worthless-for instance, real estate, that is already mortgaged for larger amounts than its real

But in this case, at any rate, hail was not forfeited. Eddie and his lawyer rushed into court 15 minutes, late, and after the Italian and the other weary witnesses had gone back to their jobs. They told the judge that they had been unavoidably de-

that they had been unavoidably delayed. It was a matter of traffic, they said, or something of that nature.
The judge, with the usual leniency of American courts, set the forfeiture aside, and set a new trial date. The whole thing had to be gone through again.

Not once but four times more, in all, the case was delayed. Demurres, continuances, stays, changes of venue, all the artillery of the skilled lawyer were discharged in behalf of the pickpocket in favor of delays and over the protest of witnesses. And still the Italian laborer stuck it out, although the case was working far greater hardship on him than on the guilty party.

All Over in a Minute

When the trial came at last it was all over in a minute, for there was practically no defense. The jury degree of the stilled in the pick of the pickpocket in favor of delays and over the protest of witnesses. And still, the case was working far greater hardship on him than on the guilty party.

Now I am able to report to you that all matters at issue between us have been composed, ex-

On the relation of the commercial lawyers to laymen, a question upon which the two associations differed, an agreement was reached declared to be of the utmost importance to the commercial lawyers. The bar associ-ation conceded the right of the lawyer to divide a collection commission with a lay agency and supported his right to transmit or receive business from a lay intermediary.

Recommendation of the bar asso-ciation that commercial lawyers not permit their names to appear in a list of bonded or guaranteed attorneys was not accepted by the league's committee. "The adoption of such a canon," said Mr. Wright, "would seriously interfere with the orderly handling of commercial business as it is now transacted."

BANKING GROUP CUTS INTEREST ON SMALL LOANS

Rate of 8 Per Cent a Year Set by Organization Formed at Chicago

SPECIAL FROM MONITOR BUREAU CHICAGO-A corporation for the rpose of making small loans to industrial workers at a rate much below that set by law has been formed by officers of 12 local banks. This is the first time bankers in this section

have organized to make small loans, according to Murray McLeod, president of the new organization and head of three outlying banks. The new corporation is prepared to lend without collateral on two character references at a rate of 8 per cent a year. The legal rate in this state is 31/2 per cent a month or 42

Based on Business Lines believe we will render a serv-sald Mr. McLeod. "Of course this is not a philanthropy. We expect to make money; but we believe that there are many people who find it necessary to make small loans that will be helped by being able to borrow at a rate within their

per cent a year.

The corporation is a parent organization that proposes to organize tence local units with boards of directors drawn from leading citizens of each community where it operates. Two such local units were formed in this city a year before the bankers joined form the larger corporation and the organizers state they have made profit on 8 per cent loans

Loans Amount to Millions The bankers' company hopes, by proving that 8 per cent can be made a profitable rate, to bring down the prevailing rate of other legal lending companies, who get 3½ per cent a month on many millions of dollars annually in Chicago, a representative of the company stated

A Russian-Mongolian Artist

By FRANK RUTTER

London | mountains. That even in desolation T is not often that we have an opportunity of catching a glimpse of the life and customs of the life and customs of the Mongolia and when we do, it is usuanter the prints of "Winter" and ally through the romantic eyes of some western European traveler sively evident. Anything more forther that we see them. that we see them. For this reason, if for no other, a collection of paintwoodcuts by one who was born in has lived in these almost totally un-explored lands—at home, with his own people-must be of the greatest

intrinsic interest. Sergei Michailovitch Kolesnikoff, whose work is being shown at 23, Tavistock Square in Bloomsbury, was born at Kalgan on the Chinese-Mongolian border, and although he studied at the St. Petersburg Academy of Arts for some time, and later came under the influence of contemporary French painting, he has yet contrived to keep the freshness of his

native vision unimpaired.

Ethnological Value His exhibition is of considerable His exhibition is of considerable artistic, as well as of great ethnological value, in consequence. He is able to interpret in a particularly vivid and individual manner many different aspects of the highly colored, faraway Mongolian life he knows so well. It is his native country alone which is particularly sympathetic, and numerous "portraits" of yaks: and over all, there is a sense of the immensity of space, that sense which no true Mongolian is ever without absorbe him—that natriarchal that absorbs him—that patriarchal land still practically untouched by European civilization, where tribal customs and everyday habits of life have remained almost unchanged within the comparatively short span

it is easy to realize how fascinating for the first time, "Q Ships." As a to any gifted and sensitive artist historical record, surely the only such a "legendary" land must be. M. valid reason for making war films, Kolesnikoff depicts its gay, good-huthis has real value: being characmored crowds, clad in their multi-colored raiment, the ubiquitous red films, by the fairness of its outlook. alert he may be. The painter's nat-

M. Kolesnikoff works chiefly in water color, a medium peculiarly the absence of luxury. The scenes in the German "U" broad effects in a few vital colors. suited to his talent for obtaining broad effects in a few vital colors. His landscapes are always simpy designed—perhaps because detail can hardly be said to exist when the ingredients of your picture must necessarily consist of leagues and leagues of desert sand and distant mountain ranges. In such a scene, against this primordial background, he will place a horse or two, a couple of traveling lamas in their familiar red and yellow hued robes and ple of traveling lamas in their lambda in the Germans put to sea with obvious misgivings.

The scenes aboard the "Q ships" with their intentionally ramshackle crews are excellent, as are those where "Q" meets "U" and we see about of many a battle of wits as well as

THE CHILDREN'S PAGE

The Story of a Garden

By MAUD WILCOX NIEDERMEYER

a certain rich woman who den to have!"
loved her garden better than And the wo anything else in the world. But she was mean and stingy and ild never spend any of her money to help make it grow. She wouldn't buy fertilizer to enrich the soil; in act she wouldn't even buy good seeds to plant. So her garden had ather a hopeless, forlorn look.

The children never hung over the ate to ask for a flower, because they cnew this rich woman was too stingy to give them any. So they would camper by her house, tittering and riggling and tossing their heads and "Who cares anyway!"

And the woman would say scorn-fully to herself: "I have a garden, and it doesn't cost me a cent to keep t. So why should I care what a lot of hoodlum children say!"

Then one day the woman grew ired of her ugly garden. It had such skimpy, straggly look that no amount of pruning seemed to help. "I will dig up my garden and throw away all this trash," she said to herself. "And I will plant new

Spade and Trowel

and worked long and hard. She shook the earth from the roots of the plants and threw the long, sobbed. "It is an ugly garden, stringy stems and faded flowers on a pile and burned them. When the her, and it said: "Maybe it isn't the

"I must have seeds to plant," she told herself, "but good seeds are expensive. I will not spend any money, and it is wrong to steal them.

The woman turned quickly, her eyes blazing. "How dare you! How dare you come into my garden and mock me!"

The child, who had ventured to Whatever shall I do?"

clean, moist modeling clay are all that is required for this fascinating game except, of course the flowers themselves. The clay must be spread smoothly in a pleasant curve across the board, high in the center, and sloping toward the edges. Damp the board first, to make the clay adhere, and then wipe it dry around the edges so that clothes and fingers shall not be stained.

Daisies, clipped short, but with an inch of stem below their white stars, come first. Stick them into the clay, closely clustered together, to make the cushion cover, and round the edges make a border of scarlet pimpernel or golden snapdragon.

Then comes the embroidery, Choose small blue, red or yellow flowers for this, but keep the lines of color separate as though the flow ers were joined by threads. Clipped short, the stems are thrust into the clay between the daisies, in whatever pretty pattern you choose. At one corner of the cushion a bow of flaming poppies, closely clustered butter-cups or fragile wild rose may be

The Indian Jam Closet

HE Indian mothers of the yessweet jams. How could they when up, and men came again with shovvind-swept els and sotenees did not own such things as closed closets? But they did have Finney the little fish boy, his eyes ways of preserving the natural fruits all wide with surprise, and Fanney's and nuts which grew so plentifully eyes were wider, but she could not around their forest homes, and their even speak, she was so surprised that Friend, mother. preserves were quite as delicious to the copper-colored little boys and girls and big chiefs of their tribes as are the strawberry jams and orange conserves to the wee folk and the grown-ups of today.

Nothing that could be used was ever allowed to go to waste by the Indians who did not have a corner grocery to run to in time of hunger, three. They drew round the edge of so the wild fruits and nuts were cups and saucers of various sizes to gathered as soon as they were ready. The acorns from the oaks were used course; you'll find them in the dish on the kitchen table, dear," she said to Joan.

Joan ran to get the dish, and soon less the circles.

Then Joan cut the petals as shown in the diagram. By folding the circles of material into four and then lickory nuts had many uses. Sometimes the meats were crushed to a cutting them with the scissors she discovered it was quite easy to make pulp and sweetened with maple sugar to tempt the appetite of the the petals a uniform shape.

Meanwhile Jack cut a candle into pieces and removed the wick. Then which look like hickory nuts, and which are called in some which which are called in some which are he melted the wax in an old tin over which are called "pig nuts" in some localities, were sweetened with lye made of wood ashes and used as then waved them for a moment in food.

Wild grapes were plentiful and pounds and pounds of them were When they started to build up the dried and stored away for winter food. There is no doubt that they waxed fabric in their fingers for a kept well in spite of the lack of jam closets, for large amounts of them have been found in the remains of the ancient bluff dwellers. Wild into a bowl-like form. When he had molded it to the right shape they both set to work on the other circles, plums and blackberries were also dried. And a use was even found for shaping them so that one fitted snugly inside the other, the largest elderberries and choke cherries, the latter being pounded in a mortar and then spread out in cakes or long strips to dry in the sun.

And when the Indian wanted a refreshing drink, there was always a store of dried mint leaves, or raspberry leaves or the bark of the wild from which to draw, and which made drinks quite as tasty as any drawn from a modern soda fountain

Woman's Influence in Politics

What have women done? What are they now doing? What will they do in future?

These questions will be discussed in a Series of 20 Articles Published Every Other Day

The Christian Science Monitor Sept. 5-Oct. 19

The articles will include interviews with outstanding women in the United States and other countries,—leaders of organiza-tions working for the public welfare, better laws and law enforcement, and the solving of social, moral and ethical Public-Spirited Women

All Over the World Will Find These Articles Awakening—Encouraging—Inspiring

Special offer of \$1.00 for 38 copies of the Monitor mailed from Sept. 5 through Oct. 19, including the series.

CHRISTIAN SCIENCE QUARTERLY

WE ARE justly proud in these days of what we are coming to call, perhaps a little prematurely, our "conquest of space."

Although the nations are still quite far enough apart and seas do still divide them in more than one sense, we have indeed crowded the meritive to travel in terms of miles, and even feel a certain pride in the knowledge gained by residence in many places. Why is it, then, that so many of us are content to be confined within a single period of time, our own, much as the peasant of a century ago was confined to his native village? For every automobile, every airplane automobile and does not know the

ants, called steam and electricity. of much assistance. He needs a con-All of this is now commonplace, although we have by no means thought out its implications or deduced its results upon modern socioused its results upon modern socious which is the same and the same an also, what is still more essential and duced its results upon modern society. But we have made another context. quest, or are in process of making us into the past are much less conone, which is not yet so fully recog-

Yet travel in time is certainly space, which we call time. With re- worth all the effort it may cost. gard to time also we may say that. There is no question, indeed, that it when we look back even a few decades, we come upon people who than travel in space can ever be, for were confined to a restricted territhe object of all travel is change and tory. The great mass of them knew only their own contemporary world of this to be had by passing out of -and so, of course, they knew even the twentieth century, into the Age that imperfectly, because the present must always be interpreted in Kansas City to Paris. If one's object a paltry three thousand only by comparison, and are understood only when traced to their

over the bank that skirts the road, is an old thorn-such a thorn! The blossoms, so graceful, so elegant, so lightsome, and yet so rich! There only wants a pool under the thorn to give a still lovelier reflection, quivering and trembling, like a tuft of feathers... There should in-deed be a pool, but on the dark grass-plat, under the high which is crowned by that magnificent plume, there is something that does almost as well,—Lizzy and Mayflower in the midst of a game at romps, "making a sunshine in the shady place;" Lizzy rolling, laughing, clapping her hands, and glowing like a rose; Mayflower playing about her like summer lightning, dazzling the eyes with her sudden turns, her leaps, her bounds, her attacks, and her escapes. She darts round the lovely little girl, with the same momentary touch that the swallow skims over the water, and has exactly the same power of flight, the same matchless ease and strength and grace.-MARY RUSSELL MITTORD, in "Our Village."

THERE can be no doubt that likeness, how can there in reality be friendship holds a sacred place aught but true friendships formed? in the hearts of most people; When material concepts yield to rea-and if such attachments as that of son and revelation, and thought at-Damon and Pythias may be said to form the highest human ideal of glorious vista opens to consciousfriendship, a certain satisfaction may ness, where friendship is seen to be be gained from the fact that there on a spiritual and enduring basis; are undoubtedly countless instances and this true concept is made mani-

Because of competition and rivalry, human ideal may appear, however, there arise in the business world it is far from perfect; for it is cer- many instances of enmity and distain that not until the human concounted a friend is suddenly recepts the divine alone as real, can garded as an enemy. This is owing true idealism be established. Is it to mankind's belief in the reality of not a fact that human friendships matter. The student who daily are apt to bear the mark of selfishness? Oftentimes, because of this, Science, "Science and Health with jealousies are aroused and much Key to the Scriptures" by Mary Baker Eddy, early learns the falsity In a marvelous discourse to his of this belief. He also learns how to disciples, the master Christian laid protect his own thought from evil

Personal attachment Christian slow to accept many of the standards Science insists, does not necessarily set by Christ Jesus for correct think-represent true, spiritual friendship. ing and living, believing them to be In the Manual of The Mother Church too impractical for daily use; and (p. 40) Mrs. Eddy has written, many of his most significant sayings "Neither animosity nor mere perhave remained veiled in mystery be- sonal attachment should impel the motives or acts of the members of tian Science has lifted the veil, and The Mother Church." The entire is showing the world how entirely Section in which these words occur are not commands in the sense of in all branch Churches of Christ, how beautiful are the friendships first Sunday of each month; and thus is indicated the importance, in Chris-The logic which Christian Science tian Science, of basing all one's rela-

PRICE TREND IN STOCKS IS REACTIONARY

Selling Pressure Brings About Sharp Drop in Various Issues

NEW YORK, July 16 (P)-Extreme dullness again characterized today's stock market, with the general list

stock market, with the general list arifting lower on a resumption of selling for both accounts.

Standard industrials and rails fell 1 to 5 points as supporting order were withdrawn, and a few of the high priced specialties broke 5 to 11 points. Call money renewed at 6½ per cent, and was in such plentiful supply that the rate was dropped to 6 in the early afternoon. There was no appreciable calling on loans. With the prospect that all federal reserve banks shortly that all federal reserve banks shortly will establish the 5 per cent rediscount rate, and that a further advance is likely before the end of the summer speculators for the advance showed little disposition to go ahead with their

Despite the favorable character of most of the current sales and earrnings reports, the motors yielded rathe meadily to selling pressure. General Motors fell 3½ points before it encountered effectual buying support, and Chrysler, Studebaker, Packard, Nash and Hudson yielded a point or more. Steels failed to respond to resorts of expanding operations in some orts of expanding operations in some

Airplane shares were again the tar-gets of bear attacks, Wright being nammered down 4 points, and Curtiss 3½. Oils, which showed signs of startg a new forward movement last eek, also joined in the decline, Housweek, also joined in the decline, Flour-ton breaking 6½ points, Indian Re-fining preferred 5½, and Indian Refin-ing common and certificates and At-lantic Refining about 3 each. American Seating and New York

Dock sank to new low levels for the With the exception of Delaware & Hudson, which advanced a point, most of the rails yielded with the indusrials, but the losses were not as large outhern Railway and Wabash each ropped more than 2 points, and Misouri Pacific, Union Pacific and Balmore & Ohio yielded a point or two.

The closing was weak. Recoveries of to 3 points were made by several of u'ative leaders after the low ering of the call money rate, but selling was resumed on a wider scale in final dealings, many issues touching lows for the day. Radio slumped more

than 7 points to 159½. Total sales approximated 1,350,000 shares.

Foreign exchanges opened steady. Foreign exchanges opened steady, ith sterling cables quoted around

The bond 'market was dull, and prices were irregularly lower today. Except for a slight firming tendency displayed by some U. S. government obligations and a few industrials, all of which, however, were lightly traded

in, the general list sagged.

U. S. Rubber 7½s, Wilson & Co. first 6s, Pure Oil 5½s, Loew's 6s ex-warrants, and Anaconda Copper 6s were among the few issues to make small gains. Dodge Brothers 6s reacted to announcement that the final date for exphanging steek under the plan for exchanging stock under the plan for merger with Chrysler had been post-poned by attracting fairly heavy liquidation. International Paper 5s also

were under pressure.

Most rails showed small losses, Public Service of New Jersey 1½s led the decline of the utilities, easing off nearly a point. The foreign list was

WHEAT PRICES TOUCH NEW LOW

today dropped to below any level which September and December deliveries had touched heretofore this season. Big receipts of wheat southwest and weakness of Liverpool quotations were earish factors.
Opening ½@1¼c off, Chicago wheat

underwent an additional sag, but then rallied somewhat. Corn and oats were also weak, with corn starting \(\frac{1}{3}\)\text{fc} down, and later showing a more pronounced decline. Provisions held firm. Opening prices today were:

Opening prices today were:
Wheat—July, 128; September, 132@
'4; December, 135%@%; corn—July,
105@%; September, 98½@97; December, 81¼@%; oats—July, new, 48¼@
%; September, new, 41%@%; Decem

Wheat closed unsettled % to 1¼ net lower, corn %@½ to 1¾c off, oats % to 1e down, and provisions unchanged to a rise of 30c.

MEXICAN REVENUES FOR FIRST QUARTER

MEXICO CITY, Mex.-Revenues of the Mexican Government during the first quarter of 1928 totaled \$44,926,701 (U. S.) which was \$2,705,276 greater than had been estimated, according to the report of the Secretary of the Treasury. Customs duties contributed

\$10,616,426.
Consular fees netted \$5,306,832. Estimates for this source had been \$3,-349,692. Income taxes for the quarter yielded \$3,901,905. Income from post office, telegraph and radio services netted \$3,227,905. Taxes on petroleum for the quarter yielded \$1,349,207, whereas the estimate has been \$2,457.

683.
From the mine taxes the Treasury received \$1,966,325, \$109,486 less than had been estimated. There was a slight gain, however, in other taxes.

BELGIAN BANK DEPOSITS RISE BY WIRELESS TO THE CHRISTIAN SCIENCE MONITOR BYWIRLESS TO THECHNISTIAN SCIENCE MONITOR
BRUSSELS, July 16—Deposits in the
Belgian State Savings Bank in June
amounted to 110,000,000 francs, about
27,000,000 more than withdrawals. Savings deposits increased by more than
255,000,000 francs for the six months
ended June 30. The National Bank of
Belgium shows an increase of 17,273,000
francs over the week-end. The amount
of gold now held by the bank is more
than 4,000,000,000 francs, the highest
since its foundation0

NEBRASKA WHEAT CROP re SIDNEY, July 16—The six counties in the Panhandle section of Nebraska will produce in excess of 15,000,000 bushels of winter, wheat. The stands are well developed, with stalks headed out and some will be ready to cut. Growers expect the best crop and greatest general yield an acre ever known in this territory.

UNION OIL OF CALIFORNIA Union Oil of California has purchased from Richfield Oil Co. about 6,100,000 barrels of storage facilities, 99 acres in fee, pipe lines and accessories on a western ranch at Torrance which were owned by the Pan-American Western Petroleum Co. Union Oil now has a total of 35,000,000 barrels of all kinds of storage.

Consumption of crude rubber in the United States in June broke all monthly records, totaling 37,676 tons, a gain of 343 tons, or almost 1 per cent, over the consumption in May, the former record month, and an increase of 3875 tons, or 11.5 per cent, over consumption in June, 1927.

LONDON, July 16 (P)—The offerings actout the wool auction sales today amounted to 9815 bales. There was a regood demand and keen competition for the finer grades of merinos. Prices were firm with a hardening tendency. American dealers purchased a few dots of superior slipes and greasy crossbreds.

ton market opened today at an advance of 7 points to a decline of 1 point. Buy-ing on relatively firm cables, and prospects for showers in the central belt, was supplied by further realizing or liquidation, probably inspired by talk of improving crop prospects over a good partlof the belt and unfavorable trade advices.

Active months sold about 3 to 7 points net higher after the cell but

points net higher after the call bu met increased offerings on the bulge and the market was rather unsettled, prices easing off from 21.75@21.65 for October or about 2 points net lower by the end of the first hour. Private cables reported a compara-tively quiet market in Liverpool, with prices steady on continental and Bom-bay buying.

CROP PROSPECTS

MINNEAPOLIS, Minn.—Crop prospects in northeastern North Dakota are the best in several years, according to Dan E. Willard, agriculturalist for Northern Pacific Railway.

"Wheat fields in northeastern North Dakota and southern Manitoba are in heading stage," his report says. "No wheat was observed in which yellowing or ripening has yet occurred.

At present, promise for wheat crop throughout the district is fine. Wheat throughout the district is fine. Wheat fields are uniformly even. strongly developed, and have good length heads. Barring hall or rust, there is promise of a splendid crop."

AMERICAN WHOLESALE PROFIT

American Wholesale Corporation reports estimated earnings after taxes for the six months ended June 30, 1928, of \$123,209, equivalent to \$2.08 a share of preferred stock. For the corresponding period of 1927 the company showed estimated earnings of \$320,935, or \$5.36 a share of preferred. The balance sheet shows the company to be in excellent financial position, current assets totaling \$14,782,248, as compared with current liabilities of \$1,602,100.

Ayres Sees Decided Change in Money Outlook—Effect on Business

Col. Leonard P. Ayres, in Cleveland Frust Company Business Bulletin, says in part: says in part:
Midsummer of 1928 probably marks
the end of an economic era in the
United States, the termination of a
five-year period/during which this
country has been the temporary cus-

odian of more than its share of the world's stock of monetary gold. Probworld's stock of monetary gold, Prob-ably these years will be referred to in our economic history as the period of Coolidge prosperity, Coolidge became President in the summer of 1923, and gold, which had

been coming to this country since the 94 been coming to this country since the 911,4 perpession year of 1920, continued to 893,4 flow in until it reached a high point 512 of more than \$4,500,000,000 in 1924. This practically marked the high level which was maintained until last sum

mer, when the outflow began that has now reduced it to the level at which it stood when Coolidge took office. During these five years this country has had so great a supply of credit that it has been able to finance simultaneously and without difficulty such credit consuming undertakings as a building boom, a Florida boom a continuous bull market, a vast extension of installment selling, a rebuilding of its manufacturing plant, and an enormous extension of its highway system. There has been credit enough for all, and for all at the same time. Nothing has had to wait for anything

As we pass into the second half of 1928 we appear to be leaving a period in which credit has vigorously sought employment, and entering one which enterprises must compete for credit. The outlook is changed, and it is one to which we have become unaccustomed. The stock market has become a great national bet against the continuation of high interest rates, and since the Federal Reserve au-thorities can hardly reverse their present policies until the excessive use of credit for speculation has been erminated, the decision will probably be against the stock market. If interest rates must remain high

much longer, business will probably suffer as a result. Already there has been a sharp reduction in the flotation of new bond issues. This means that new construction that would have been been and purchased. begun, and purchases of new equipment that would have been made he months just ahead, have been de-

INTI. HOLDING & INVESTMENT

NEW YORK, July 16—J. Henry Schroeder & Go. and British & Colonial Corporation have formed a syndicate to buy from the International Holdings & Investment Corporation 380,000 of its unissued shares at \$12 each and to take option on further 246,400 shares at \$15.

TO HOLDERS OF Third Liberty Loan Bonds

The Treasury offers a new The Freasury one 3% per cent. 12-15 year Treasury bond in exchange for Third Liberty Loan Bonds.

The new bonds will bear interest from July 16, 1928. Interest on Third Liberty Loan Bonds surrendered for exchange will be paid in full to September 15, 1928.

Holders should consult their banks at once for further de-tails of this offering.

Third Liberty Loan Bonds mature on September 15. 1928, and will cease to bear interest on that date.

A. W. MELLON. Secretary of the Treasury. Washington, July 5, 1928.

TIME FOR INVESTORS TO INCREASE THEIR PURCHASING POWER

a serious dilemma, in the opinion of the Brookmire Economic Service, In-

reporated.
Following a reduction of the reserves of member banks to the lowest level since 1921, the federal reserve authorities brought further pressure to bear upon the stock market by per-mitting the Chicago and New York banks to raise the rediscount rate to

per cent. Thus the bankers insist on the one hand that brokers' loans be reduced and, on the other hand, if this is not accomplished immediately, member banks will be expected to sell securiies in order to improve their reserves In either event, there is little reas for expecting an immediate upward movement in the general market. Until the fundamental credit situa-

on is corrected, it would be better to department stores with sales in exstand aside and not enter the stock

GOOD BUYING DEVELOPS IN

NEW YORK, July 16—What contributes the most to the good feeling in steel circles is the fact that practically all of the large consuming lines are buying simultaneously for the first time in several months.

While purchasing on the part of

Awards at New York during the first half of the year fell far short of those for the first half of 1927, or as 182,800 tons compares with 278,300. However, it is probable that when statistics for the entire country are issued by the Department of Commerce, a new high total will be shown.

There has already been one important new high six-month record established, steel ingot production which was 3 per cent higher than the previous record for the first half of 1926.

Indications now point to 1898 being

pig iron was unusually interesting. The new price is \$19.50 a ton, after the level had held to \$20 a ton since February. One theory of the cut is to discourage Buffalo producers from storing iron during the winter at New Jersey points.

The encroachment of Buffalo iron was also the reason for the drop in the Chicago quotation to \$17.50 a ton, the lowest price since 1915. The average price of pig iron is the lowest in 12 years.

Nonferrous Markets

Nonferrous Markets

The reduction of \$2 a ton in lead was the outstanding price feature of the nonferrous metals during the week. This was made by the American Smelting & Refining Company and was followed by other lead producers, the new quotation becoming 6.20c a pound, New York, the first change since May 29, at which time the price had been marked up by that amount. Prices in the East St. Louis district became first 6.10c a pound and then 6.05c.

to the Connecticut Valley, and 15c c. i. f. European ports.

The tin market was a quiet affair.

Prompt tin sold around 46c a pound, up 4c, with futures going at 45½c.

Present price levels are as low as at any time in four years.

Zinc prices were unchanged at 6.20c and business was light.

MONTREAL, July 16-Power sales MONTREAL, July 16—Power sales of West Kooteney Power & Light Company are running 10 per cent higher than last year, due largel to increase requirements of Consolidated Mining & Smelting Company of Canada, which controls West Kootenay. Sales in Penticton, Kelowna and southern Okanagan districts are about even with 1927; requirements of Allenby Copper Company, on Copper Allenby Copper Company, on Copper Mountain extension, are also practically unchanged.

Mountain extension, are also practically unchanged.

Plans for another large hydroelectric development on the Pend Oreille River care still before provincial government for consideration. This location is almost directly south of the town of Trail, where is located Consolidated Smelters plant. This plant probably would use new power either in the production of electrolytic copper or in increased output of lead and zinc.

Chicago 6, Philadeiphia 3

By winning their sixth straight game on Sunday, the Chicago Cubs not only strengthened their hold upon third place in the National League pennant race, but they attracted the concentrated attention of basebally followers who have been watching the three-cornered struggle for the runner-up position to the St. Louis Cardinals. At the present period the Cubs look like the best club to give the Cardinals a race for the leadership.

On Thursday of this week, the New York Giants and Chicago Cubs will face each other in the first of a fourgame series which will ultimately settle the issue of which club will be the

face each other in the first of a fourgame series which will ultimately settle the issue of which club will be the Cardinals' chief opponent for the leadership temporarily at least. The Cardinals apparently had eliminated the Giants from the figuring when they took three games out of four from them and forced them into third place. But the Giants are persistent. They faced Cincinnati Saturday and Sunday with the Reds intrenched in second place and forced them back into fourth place by taking two games. This again arouses the usual question. "Can the Giants win the pennant?" St. Louis followers point confidently to the last series between the Giants and the Cardinals at a crucial moment in the Cardinals at a crucial moment in the League read and services and son the Cardinals at a crucial moment in the League read and services the confidently to the last series between the Giants and the Cardinals at a crucial moment in the League read and services the confidently to the last series between the Giants and the Cardinals at a crucial moment in the League read and services the confidently to the last series between the Giants and the Cardinals at a crucial moment in the League read and services the cardinals are persistent.

Santa Monica and John B. Wheatley. Santord University. the Cardinals at a crucial moment in league race and say, "No!" em-

bhatically.

Brooklyn has taken the Cardinals by surprise. After winning six of their last seven games, the Cardinals faced last seven games, the Cardinals faced Brooklyn and lost a game Saturday and another Sunday, enabling the Giants and Cubs to gain ground on them. Cincinnati was in second place on Saturday and lost a golden opportunity of gaining on the Cardinals by letting the Giants win. If Brooklyn can continue to best the Cardinals through the rest of the series there are hopes for the Giants and Cubs tightening the league race and bringing the Cardinals down from the high pedestal they have enjoyed for about three weeks now.

Cardinals Move Slowly

The Cardinals have won only eight

final round of European zone Davis Cup tennis play.

P. Gaslini evened the count in the first of Sunday's matches by defeating Pavel Macenauer of Czechoslovakia, 5—7, 6—4, 6—4, 6—3, Baron H. L. Demorpurgo, Italian ace, then scored the final victory over Jan Kozeluh, 6—1, 6—2, 6—0.

If De Stefani, whom the professors at his university kept from defending the honor of his country against the Bohemian Republic, is freed from the clutches of the pedagogues in time to return to the lineup against W. T. Tiden 2d, and the other Americans, the Italian tennis enthusiasts, who

few weeks, had to face them and then Cincinnati, they have managed to maintain a good margin over second place. With the Cubs and Giants engaged in a series this week the Cardinals hope to increase their margin while playing against Philadelphia. The schedule has favored the Cardinals lately and will continue to favor them during the ensuing week.

Ever since the Chicago Cubs ranthrough a winning run of 13 straight games, contenders for the National League pennant have been watching this aggregation with some concern despite the Cubs' only mediocre play during the latter part of May. Since

Nehf wins Regularly

Nehf stands out as the most consistent pitcher on the staff with six straight victories to his credit. Another week may find the Cubs in first place. Their series with the Giants place. Their series with the Giants will be the big test. They have the best record for the month to date in the league with 11 victories and only five defeats, while the Giants have won six and lost seven, and Cincinnati has won eight and lost seven, and Cincinnati has won eight and lost four. The Cubs have won 15 of their last 22 games, showing their steadiness over the past Cincinnati was going along at a Cincinnati was going along at a Cincinnati was going along at a circular of the staff with 25.

The second day was the fortunes of the game swing all the other way, for the raw, for the raw, for the raw, for the raw, for the game swing all the other way, for declaration at the flat with 25. Elkins and his chances of the feathlon competition at Amsterdam. few weeks.

Cincinnati was going along at a rapid pace when it came up against the New York Giants, who, in the last spurt to regain second place, which they lost when facing the Cardinals, stopped the Reds short and took the survey up position away from them. runner-up position away from them by winning two straight. It must be DUBUQUE TO RESUME by winning two straight. It must be said in all due credit to the Reds that they did not give either game to the Giants without displaying a fine style of basebail. Rixey lost on Saturday by the close score of 4 to 2, while Lucas, in his first start in weeks, was de-feated 2 to 1, holding the Giants to six hits. Benton and Fitzsimmons won for the Giants and pitched brilliant games. Benton won his fifteenth game, while Fitzsimmons was credited with his eleventh victory. These two pitchhave been the mainstays of the Giant staff and will give all contend-ers trouble down the last stretch. Meanwhile, baseball followers will do well to watch those Cubs!

CHICAGO SPURTS TOWARD THE TOP

Moyes From Seventh Place to Fourth in Little More Than Week

AMERICAN LEAGUE RESULTS SATURDAY

From seventh place to fourth place in nine days of play is the record of the Chicago White Sox in the American League pennant race, the only club in the league to do better than the leading Yankees during the month of July to date.

The White Sox started to win consistently immediately collecting the

RESULTS SUNDAY

sistently immediately following the resignation of Raymond W. Schalk as manager. This is nothing against the management of Schalk for the reason that he had been building up his team ever since the opening of the season and his resignation came at the identical time that he, apparently, had the club well in hand and the prospects ahead were encouraging. Under the guidance of Russell A. Blackburne, a veteran of many a baseball campaign

The White Sox showed such strength against the New York Yankees in their last series when they won two out of four and nearly won a third that followers are awaiting with interest the opening of a four-game series between these two clubs on Wednesday. The surge of the White Sox toward the front is not believed to be a temporary spurt which will peter out. The club has good pitching, is fast on the bases and in the field and fairly strong at bat. However, it will take the White Sox a long time to get higher than they are, if they do manage it, for the Browns in third place are five games ahead of the Browns.

Fourth-Place Struggle
Cleveland's loss of fourth place may

Cleveland's loss of fourth place may be only temporary. The Indians have lost their position in the first division many times only to regain it quickly. With the first three positions in safe keeping for at least another week, the struggle for fourth place chiefly be-tween Cleveland, Chicago, and Wash-ington will be watched with interest. From fourth place to last place is only The Phoenix (Ariz.) Chamber of Commence is to be commended on coming to the financial aid of Clyde Blanchard, University of Arizona hurdler, who stowed away on board the S. S. Roose-

run.

It is interesting to note that the Yankees are not holding their margin of 11½ games over second place by dint of extra heavy hitting. During the last 13 games the Yankees have made 105 hits and 50 runs to 115 hits and 58 runs for their opponents. Yet and 58 runs for their opponents. Yet they have won seven of these 13 games. Their average number of hits

Chicago's Showing Best

Chicago's showing this month has been the best, with 12 victories and WINS EASTERN TITLE been the best, with 12 victories and six defeats, while the Yankees are

One year ago today, in the season in which the Yankees established a new high total of games won, the Yankees were leading the American League race with a record of 60 victories and 25 defeats, a percentage of 7.06. They held a margin of 11 games over Washington, at that time in second place. The Yankees' total of victories at this time is the same as last year, but they have lost only 23 games, giving them a percentage of 7.23, 17 better than last year's mark at the corresponding time. Their present margin over second place is 11½ games. This indicates that their chances for setting a new record are very good. Their finishing percentage last year was 7.14, or nine points less than their present mark.

MISS GLADMAN WINS TITLE
CINCINNATI. O. (P) — Miss Marjorie K. Gladman, 19-year-old national girls' tennis champion, of Santa Monica, added the tri-state women's sligles tille to her string of victories Sunday by defeating Miss Clara Louise Zinke of Cincinnati, 6-4, 6-4. The University of Southern California girl has been undefeated this season in her first invasion of the West and middle West. She recently won the western title and the Missouri Valley titles. Miss Gladman also is champion of her university, of the lowa state tournament and of Southern California, as well as being the national girls' title holder. Emmett J. Pare, Chicago, won his way to the finals in a hard battle with Paul Kunkle of Cincinnati, 4-6, 5-7, 6-4, 6-2, 6-4.

MANGAN AND CONSIDINE WIN WASHINGTON (P)—Thomas J. Mangan and Robert Considing both of the West Shengton of the West Shengton of the West Shengton of the West Shengton of Southern California, as well as being the national girls' title holder. Emmett J. Pare, Chicago, won his way to the finals in a hard battle with Paul Kunkle of Cincinnati, 4-6, 5-7, 6-4, 6-2, 6-4.

MANGAN AND CONSIDINE WIN

BURKE WINS RIFLE TROPHY OF ENGLAND

BISLEL CAMP, England (49) — The challenge trophy offered to the Na-tional Rifle Association by the Do-minion of Canada Rifle Association as the award for the winner of the grand aggregate at the N. R. A. meet at Bisley, was won by Lleut. Desmond Burke of Ottawa with an aggregate score of 520 out of a possible 555.

The scores in 10 individual service competitions determined the winner of

competitions determined the winner of the grand aggregate, which is an im-portant feature of the great Empire meeting which concluded at Bisley

Sunday.
In addition to the cup. Lieutenant
Burke won \$50. Sergeant Lewis of the Welsh regiment was second to win the silver cross and \$30. The Australian Bisley team leader, Pavey, was third to win the bronze cross and \$20.

NEW WORLD RECORD FOR GERMAN WOMAN

German swimming star, Sunday set a new world's record for women in the 200-meter breaststroke event. Her time was 2m 11.2c

The listed world's record for 200 meters breaststroke swimming by women is 3m. 18%s., set in 1926 by M. Baron, of Holland. STAR YACHT MINX CHOSEN

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR
NEW YORK—Minx, Star boat owned
by W. C. Atwater Jr. and J. J. Atwater,
has been chosen international challenger
from the Great South Bay Star class
fleet by a unanimous waiver from the
other members of the fleet. The boat
will be sent out to Newport Harbor,
Calif., for the international Star class
series, which starts there Aug. 30. SPECIAL TO THE CHRISTIAN SCIENCE MONITOR BROKL PUBLIC LINKS VICTOR

MINNEAPOLIS (P)—Frank Brokl of the Phalen Club, St. Paul, won the state public links championship Saturday, defeating Ade Normack of the Armour Club, 7 and 5. The championship was played over the Armour course. Brokl and Normack will represent Minnesota at the State Public Links Association tournament at Philadelphia.

"ALL BLACKS" WIN, 44 TO 8 BULAWAYO, S. Af.—The New Zea-and All Blacks Rugby football team, by touring South Africa, Saturday werwhelmed Rhodesia, 44 to 8.

French Athletes Contribute Marks

BY THE ASSOCIATED PRESS

ONE undisputed world record for the 800 meters of lm. 50 2-5s. by Seraphin Martin and a 1500-meter mark of 3m. 52 1-5s. by Jules La Doumegue (two-fifths of a second faster than the accepted world record held by Paavo Nurmi) were France's contribu-tions to world athletics in the final pre-Olympic preparation. They were made in a meet disputed under the auspices of the French federation as the championships of

La Doumegue in turning in his performance Sunday, like Martin on Saturday, was too good for his competitors. Both performers so far outclassed the other starters that they were forced to negotiate the entire last part of their events alone. La Doumegue reached the 800-meter post in the remarkable time of lm. 59s,, but was much slower in covering the last 700 meters. Otto Peltzer of Germany is credited with having run the 1500 meters in 3m. 51 1-5s., but the record has not yet been accepted by the international federation.

AMERICAN YACHTS LOSE ON SECOND DAY

DUNOON, Scotland (A) - American himself, the club has won eight games and lost four. His leadership has evidently inspired the club to greater effort.

The White Sox showed such strength by the quartet of British vessels.

candidates for Olympic honors have arrived here and are going through a final course of training before their departure for Amsterdam. The Ger-man Athletic Union has offered them training facilities at the Berli

Stadium.

The Japanese candidates are K. Yoshizumi, javelin: M. Oda, hop, skip and jump and javelin: Y. Nakazawa, pole vault; J. Alzawa, 100 and 200-meter races; T. Itsuki, decathlon: K. Yamada, marathon: C. H. Nambu, broad jump and hop, skip and jump: Y. Miki, hurdles; J. Nagatani, 5000 and 10 000. meter races; K. Kimure, kich.

MISS GLADMAN WINS TITLE

Washington, won the middle Atlantic tennis doubles championship Saturday by defeating Edward Jacobs of Baltimore and Alfonso Smith of Greensboro, N. C., 6—4, the fifth and deciding set of their match. The match had been kalted Thursday by darkness with the sets at 2-all, 7—5, 1—6, 3—6, 6—4. The Washington players will represent the middle Atlantic section in the national doubles tournament at the Longwood Cricket tournament at the Longwood Criclub, Chestnut Hill, Mass., Aug. 27.

BRIDGEPORT, Conn.—P. M. Jones of the Richmond County Country Club made a hole-in-one in the final round of the Brooklawn Country Club invitation golf tournament, here, Saturday. It was at the 107-yard fifteenth hole that his mashie-niblick shot made the cup.

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR
REVERE, Mass.—Géorge Chapman,
former motorpaced cycling champion of
the United States, won the 40-mile
motorpaced race at the local track Saturday in 55m. 494-5s., defeating Lawrene Gaffney of New York by five yards.
Victor Hopkins finished third.

SANDHAMN, Sweden (*P)—In an oper race for six-meter yachts Saturday the American boat, the Saleema, won by 200 yards over the Swedish Gold Cup yacht Ingegerd. There were 28 in competition and the Figaro, the Norwegian vesse which recently won the Scandinavian Gold Cup, finished eleventh. SOMERVILLE WINS AGAIN

TORONTO, Ont. (P)—For the second year in succession C. Ross Somerville of the London Hunt Club won the Ontario amateur golf championship, defeating Jack Cameron of Mississauga, 2 and 1, in the 18-hole final Saturday afternoon. BROWNS GET TWO DALLAS, Tex. (P)—J. W. Morris, business manager of the Akron Club in the Central League, announced that Walter E. Euller, third baseman, and Herbert Kelly, outfielder, of Akron, had been sold to the St. Louis American League Baseball Club.

STAMFORD BRIDGE, Eng. (P)—Miss M. Clark of South Africa won the 100-yard hurdle race in the Women's Ama-teur Athletic Association meet here Sat-urday in 13 4-5s., which was claimed as a world's record.

FINAL RUN THE

Eastern Yacht Club Fleet Disbands at New London Port

SPECIAL TO THE (HEISTIAN SCIENCE MONITOS erich and Port Colborne, in the event proved to be the finest run of the en- waterway scheme being carried to tire cruise from Block Island to this fulfillment, said Prof. W. W. Goforth port, the Eastern Yacht Club cruise of The final run covered a distance of 25 miles, and there was a strong southwest breeze blowing which carried the yachts over the 25 miles of rough seas lake freight, and apprehension has

shed almost 13 minutes ahead of its exact from its present obstructions.

RADIO POWER upon my own long acquaintance with the electrical service industry, that the voltage regulation maintained in TRANSMISSION STILL SOUGHT

> Despite Many Authorities' Opinions

purposes-is the object of experiments now in progress in England. The General Electric Company, Ltd., is conducting tests with an electron a bank of these powerful tubes in series will radiate sufficient amounts of energy, over a considerable distance, for lighting a town or operating the machinery of a factory

A report from London to Washington, D. C., concerning these farreaching preliminary tests states that the research laboratory producing these 30-kilowatt valves or tubes "are aiming at wave lengths far below those at present in commercial use, with the possibility in mind of employing wireless for transmitting power." This report, however, points out the limiting factor which may defeat such an attempt when it is admitted that power for radio signals is infinitesimally small compared to that required for lighting and other industrial uses. Despite this admission, the experiments are proceeding and the results will be keenly antici-

In the United States there are two H. Dellinger, chief of the radio laboratory of the Bureau of Standards, admits of the possibility of send-ing useful amounts of electric energy from one point to another by radio but he scoffs at the practicability of such an undertaking; contending that the cost of a power-transmitting station would be prohibitive. He points out that the erection of such a plant would require the wealth of Henry Ford—let us say, at least \$2,000,000,000

Nikola Tesla, the scientific wizard, has long advocated the feasibility of transmitting electric energy from one place to another by radio. His enthusiasm on the subject is without a. m.—Orthophonic concert. Announcement; Bud Gray and Metropolitan Acts. p. m.—Time; weather. damper. The ardor of C. Francis Jenkins, a Washington inventor, is hardly less keen, since he claims that with radio masts comparable to the Eiffel tower he could transmit useful amounts of energy, taken from the air, from coast to coast.

Civic League Gives Aid to Recreation

Playground Advancement in Massachusetts Among Activities

Civic leagues, often supposed to deal only with weighty subjects and serious problems, may sometimes be the originators of play and recreation, it was shown by Joseph Lee, president of the Massachusetts Civics League, in a radio address from Boston in which he described the founding of the first supervised playground in the United States here, The transmission of power by radio and stressed the need of play as a -for lighting and other industrial part of the educational system of the

Speaking during the weekly period given by one of the Boston radio stations to the various social agencies. Mr. Lee told not only of tube having a power input of 30,000 the league's initiation of the earliest watts, evidently contemplating that hank of these powerful tubes in of its service in securing continuation schools in Massachusetts, of working for visiting teachers and more public kindergartens, of helping to establish a juvenile court and a state-wide probation commission. During the 30 years the league has been active it has obtained the passage of laws for tenement improvement, worked for town planning helped in establishing regulation, active in the enforcement of prohibition laws, being instrumental in bringing about a state "padlock law," and has accomplished much in prison reform.

NEWSBOYS OF BOSTON TO JOIN MUSIC CLUBS

Plans for an orchestra, a glee club, harmonica corps and a fully schools of thought with respect to equipped band, to be composed enpower transmission by radio. Dr. J. laid by the Harry E. Burroughs Newsboys' Foundation, with the first meeting of these organizations to be held on July 21. It is expected that 700 "newsies" will gather at the building soon to be officially opened as the home of the foundation

While these musical activities ar to be but one of the educational and recreational activities of Mr. Burroughs' foundation, it is announced that four musicians have been engaged to coach this work. John A. O'Shea, superintendent of music the Boston schools, will coach the boys' glee club; Francis Findlay, formerly professor at the New England Conservatory of Music and Boston Symphony Orchestra player, will train the orchestra; Theron Perkins, formerly Massachusetts State bandwill direct the band; and master. Borrah Minnevitch, known as one of the greatest harmonica players, will have charge of that part of the work.

GREECE PROGRESSES IN HISTORICAL SUIT

the thermometer mount, the Seiberling Singers have Republic of Greece to recover possession of some 300 leaves of pure placid waters and music descriptive gold of the laurel and oak leaf type, of such for their program of Tues-day evening, July 17. The "Singing logical and historical value, such as Violins," a chorus of violinists per- men's hairpins and a gold and silver forming in unison, will play Saint- medal, has been advanced a step beautiful descriptive piece toward final decision by an order of 'The Swan," identified with the danc- the full bench of the Massachusetts Supreme Court, requiring Aristides dreams of canoes drifting along tree- Koukouras, possessor of the articles, o answer questions asked him about hem.

Odds and Ends

Commonwealth The term "commonwealth" is generally regarded as synonymous with "commonweal"—a government in which the public has a direct voice. It was used in a special sense to denote the period in English history between the close of Charles I's reign in 1649 and the Restoration of the Monarchy in 1660. "Commonwealth" is the official designation of the states of Massachusetts, Pennsylvania, Virginia and Kentucky and the federation of the Australian colonies in 1900 took the title, "Com-

The Children's Corner

A Continual Calendar

Work and Play for Every Day

JULY
In the Land of Pleasant People
Every hour is full of cheer,
Merry children, friendly neighbors,
Work with joy and laughter here.
Where's this land?—It may be near Monday ARE you cutting out and mounting your continual calendar every week? One girl cuts out the whole Children's Corner, which contains the Calendar and Snubs, and pastes it on blue paper about eight inches wide and thirteen inches long. She pastes the calendar an inch and a half down from the top of each page. This leaves room for the rib-bon by which the pages are tied to-

she makes a tiny mark beside it on her calendar. Make a list on the left side of line drawn down the middle of a sheet of paper of the things you like to do outdoors. On the right side make another list of things someone else might like to have you do. Perhaps your lists will read like this:

gether and hung up. When she has carried out one of the daily plans

Play ball. Clean corners of yard. Climb a tree. Pick up papers. Sail boats. Weed flower garden. Now close your eyes and put two fingers on the paper, one on each side of the line. Open your eyes and do what your fingers have chosen for you. Begin with the right side first and you may find it is just as much fun as the other side. Wednesday

Making surprise music will give you many a merry hour. On a big piece of heavy paper or thin card-board draw some notes like those in the music books, only make your notes much larger. Make the of the note five inches long and the across. Cut out these notes care-fully. Then take a sheet of paper about two feet long and one foot wide. On this draw a big music staff, making the five lines about two inches apart. Pin the staff on to a curtain. Each player is blindfolded and given five notes which he mus pin on the staff. Then the player is unblindfolded and asked to sing the notes. If they are above the staff he must sing very high, and if below, he must sing low notes. When everyone has had a turn, all the children sing the notes together.

Thursday
Golden sunshine, sunset skies.
Caught on wings make butterflies. Start a butterfly book and try to and colored pictures of the many lifferent kinds of butterflies. When you are riding in the country or walking through fields, watch tiful specimens. Write down in your book the date and a description of

The Woman From Texas Oklahoma City, Okla. THE following incident was overheard at an important meeting held here and attended by a

One woman sald to another, "I am so glad to see Mrs. — from Texas here today, and to see that she did not let clothes keep her away! One who overheard the remark and who also knew something of the circumstances, said: "I, too, am glad to see Mrs. — here and I am glad to tell you that she could have been dressed as well as anyone here But she preferred to wear her muchworn clothes and use the money thus saved to pay the railroad fare and expenses of a friend so she, too, might have the privilege of attending

royal robes and the writer under-stood the reason of the radiant face of the woman from Texas.

- was clothed in

this meeting."

Truly, Mrs. -

Modern Youth LETTER written to the Sacramento (Calif.) Union and signed by William W. Weber, who styled himself "a man of threescore and above ten," has been clipped and sent to the Sundial by Miss S. B. Mr. Weber related how his car became stalled late one night after the garages had closed. Four young men came to his assistance. Seeing that they could not make the necessary repairs, they went and got a friend out of bed who towed Mr. Weber home. The letter was written to offer public thanks to his unknown benefactors, who even declined a small reward, saying: "No, thanks, Dad, we are only too glad to help."

Reward of Integrity WHEN the chance to leave the

country presented itself to a young man under heavy bond and facing a 15-year prison sentence, he spurned the advice of a companion. "No," he said, "I see the mistake I made, and regardless of what the law may do to me I only want the chance to make this mistake right; and, even should it mean going to prison, I intend to be a man when I come out." It was therefore no surprise, according to the contribution from Mrs. A. M. H., Okmulgee. Okla., that the young man was given the opportu-nity to make good outside prison

The Christian Science Monitor Editorial Board

Jugoslavia's Political Crisis

UGOSLAVIA'S emergence from its political crisis with a Cabinet headed by Gen. Stevan Hadjich has temporarily eased a difficult situation. A Cabinet of experts, representing all racial groups, it is likely to continue to meet with the approval of Stefan Raditch, the Croatian leader, only so long as it remains an "election Cabinet" and does not attempt to work with Parliament for the solution of the problems confronting it. With much emphasis the Croatian leader has made clear that nothing short of dissolution of the present Parliament and new elections will satisfy him, and that his support is dependent upon these contingencies. The present crisis has its immediate origin in the debate over the Nettuno conventions, which extend to Italians the right to own land on the Adriatic coast. The conventions caused serious misgivings among the Raditch group, but the previous Government was willing to ratify them because it was desirous of the most friendly relations with Italy, even at the price of important concessions.

A still deeper origin to the ministerial crisis, however, is found in the struggle between the protagonists of a "Greater Serbia" and those who are working for a sort of United States of the South Slavs, in which equality shall prevail among all the racial groups. Most new states have passed through a similarly difficult stage to the one in which Jugoslavia now finds itself, this being, in brief, that the Serbs of the Old Kingdom, although they constitute appreciably less than half of the 12,000,000 people in Jugoslavia, are dominating the Kingdom. And that domination is resented by the Croats, who live in a beautiful, extremely densely populated district in the north and west part of Jugoslavia about the largest and most attractive city in the Kingdom, Zagreb, and who also pretend to

the right to dominate. For ten years now in Jugoslavia the Croats have been playing a losing game. The Serbs have outdone them. The Serbs have built up Belgrade at the expense of the whole Kingdom and to the disadvantage of Zagreb. They have made Belgrade the center of everything, something that was really inevitable, for Belgrade is the natural capital. The Serbs also have completely taken over Macedonia, not as a part of Jugoslavia but as a part of Serbia. They have strengthened their influence among the Serbs of the new provinces and played them off against the Croats. The old Serbian parties have even gone into the heart of Croatia and opened clubs and gained followers and elected deputies there. They have also won the cooperation of the Slovenes and the Mussulmans. In the relentless political struggle one side was bound to win, and the Serbs have won against the Croats, with a resulting undue economic domination.

But while this economic inequality will doubtless be remedied, there is another evil that is much more menacing. That is the campaign of the "Great Serbs." These do not recognize Jugoslavia or Jugoslavs, and want to call the whole Kingdom Serbia. They maintain that all the people in Jugoslavia are Serbs. They seriously assert that the Croats are Serbs. They maintain that the Serbs alone have brought into being what there is of South Slav art and culture, that only they have been the champions of freedom, that they preserved the language and national ideals, that they established Jugoslavia. They protected Europe from the Turk, put an end to the German peril and saved the world for democracy! They are predestined to dominate the Balkan peninsula and rule the South Slavs, who are really Serbs.

This is a very dangerous element in Jugoslavia, and it may be hoped that its baneful and arrogant influence will soon disappear, for then will come a greater opportunity for a more practical South Slav unity. In many ways the Serbs will probably continue to dominate Jugoslavia, but they will come more and more to lead as big brothers and not to control as masters. The adjustment will be made only gradually, but in time Serbia will exercise only her proper share of influence, and that in cooperation with the other groups, large and small. Jugoslavia is slowly moving along that

Variations in Interest Rates

ESPITE the apparent fact that ranking next to colonels in number, the citizens of the United States are mostly entitled to call themselves "economists," thus evidencing a wide knowledge of the "dismal science," there is manifested in discussions of the recent sharp fluctuations in interest rates a discouraging attitude of wonderment as to what it is all about. Accustomed as the man in the street has been to accept the assertions of self-styled 'economists," prognosticators and forecasters concerning the causes of interest changes that affect speculative stock operations, the difficulty has arisen that hardly any two of the wise men seem to agree as to the factors determining interest rates.

When experts disagree, how is the common or garden variety of citizen to decide? The "economist" of Bank A issues a statement asserting that it was the exportation of a considerable quantity of the metal gold that caused

the recent sharp advance in interest rates on call loans. Next day the "economist" of stock exchange house B avers that gold shipments have nothing to do with the case, but that it was the desire of the federal reserve bank system managers to check undue speculation that forced the rate up. A day or two later "forecaster" C. who advises those inclined to speculate as to probabilities of the stock market, announces that the real reason why rates go up or down is that the money market is controlled by powerful interests that are able to mark interest rates up or down at will. On one point each of these authorities agrees: he is right, and everyone else is wrong.

It might be helpful in arriving at a solution of the interest problem to consider that interest on loans is in the nature of a payment for insurance of credit. Where the risk is considerable, interest rates are high. Where, as in the case of the \$500,000,000 of bonds recently issued by the United States, there is no risk, the rate is low. That "call money" should bring 10 per cent, while bonds paying only 3% per cent are readily marketed, shows that there is no invisible money power that is able to dictate to borrowers the terms on which loans are

By Popular or Electoral Vote

CENATOR NORRIS of Nebraska, in declining the proffered nomination by the Farmer-Labor Party as its presidential candidate, takes occasion to refer to what he calls "our antiquated and illogical system of electing a President." He states his belief that through the operation of this system it is impossible for one who has not first been nominated by one of the dominant political parties in the United States to be elected. Then he goes on to say that when special privilege controls the machinery of both these political organizations the people are helpless except to express a choice between these two evils.

The Senator is not the first to charge that the method of choosing a President and Vice-President operates as an effective bar to the expression of the popular preference of the electorate. There have been occasions, as the record shows, when the choice of the electoral college was not that of a majority of the qualified electors voting in the several states. Theoretically, at least, the electors are chosen by popular vote, but it has been shown that it is possible, where the deciding majorities in some states are small, and where the representatives of the minority party have been chosen by overwhelming majorities in their several states, to constitute an electoral college which is not actually representative of the popular vote.

In the approaching national election there promises to be illustrated, especially in the South, the operation of the rule of which Senator Norris complains. Indications in many sections of the South are that thousands of Democrats who oppose their candidate's antiprohibition plank will either refuse to vote at all, or cast their ballots for the Republican candidate. Many of these, realizing the difficulty of changing the result in states usually overwhelmingly Democratic, probably will not vote. But if it were possible to join with the dry voters in other states in piling up an overwhelming popular majority against the nullification candidate they would be encouraged to discard party traditions and give their support to the candidate of their choice.

Experience seems to have taught even the casual student of practical politics in the United States the futility of attempting to gain the control of governmental machinery through the aid of so-called third-party organizations. These have, in times past, been effective to the extent that they have compelled the recognition of some of their less extreme demands by the older and stronger parties. At present there seems little likelihood that they will be able to do more than in the past. Perhaps the condition to which Senator Norris now calls attention may be one which, even under the ægis of some minority party, might be emphasized into the proportions of a national political issue. The system which, early in the history of the Nation, was developed into the electoral college methods, has little to commend it to the people of the present day. The American people, prior to the meeting of the national conventions this year, proved that they were able to dictate, if not in both instances the nomination of candidates, at least the structure of the platforms upon which the candidates should stand. Would it be too much for them to insist, also, upon the right similarly to record their individual preferences in the elections in November?

Japan's Political Status

F THE elections that have made 1928 more than usually politically noteworthy-Mexico's and Germany's, the French and Polish and Japanese—the last named (though first to occur) remains especially interesting. One means that the resulting situation is so markedly unsettled that it can be held as only momentary. The drift may be either to right or left (at this writing nothing forecasts direction), but assuredly early change of some sort there must be. The question to be answered is not one of democratic advance, for an election like last February's, with the voting lists enlarged 300 per cent, not only makes full reply to that, but actually set a new record of such sort. Furthermore, no less than 81 per cent of the registered vote was cast, and if that was somewhat due to the novelty of the new broom, it is also to be seen as a result of the genuinely democratic feeling abroad throughout the Mikado's islands. It is not "giving the people a voice" which is the matter of present concern, but 'What have the people said?"

The latest election was necessitated by the dissolution of the Diet, in which the Tanaka (Seiyukai) Ministry, but nine months in power, had lost its majority. The party could count only 188 seats of the 466, while the (Minseito) Opposition, led by former Finance Minister Hamaguchi, held 216: sixty-two were scattered among several lesser groups. Business came to a standstill, to all intents, while the country awaited the results of that first general election since the passage of the new suffrage law-and the election brought no solution. The official returns set the Government seats at 221, the Opposition being but seven less: 214. Then followed the Independents, the Proletarians, the Business Men's League and the Kakushin Club, aggregating thirty-one. Failing a mathematical majority by a baker's dozen votes, Baron Tanaka's following none the less drew enough from the middle groups to elect their candidate for Speaker, and have since maintained themselves, albeit precariously. The Government has been directly supported by 226, the Minseito by 228, but of the remaining twelve enough have played "Seiyukais of the moment" repeatedly to stave off the carrying of a no-confidence vote, which has been the chief effort of their opponents. This, briefly, was the distinctly unsatisfactory status prevailing when, the other day, the House was prorogued.

It is quite true that there is no more difference between Seiyukai and Minseito than twixt tweedledum and tweedledee. (It looked for a time as though the Shantung developments might differentiate them, but the whole Chinese question is now held as a national, not partisan, matter.) That, however, is not the central point in issue. Japan has turned to the party system of government. She has widened her suffrage more consistently and rapidly than has any other state. In the face of which facts (possibly, indeed, because of them) what amounts to a parliamentary deadlock has resulted. And a present-day world, genuinely interested in the spread and deepening of popular control of government, is proportionately keen to see how Dai Nippon is going to solve the riddle.

It is believed that the Diet will not convene again until shortly before the coronation ceremonies of next November. This should give Premier Tanaka time so to strengthen his lines as to carry on-unless it turn out that the summer brings opportunity for Hamaguchi to build up his Minseito legions, and thus supplant today's Government.

The Grand Tour

FTER commencement, what? How many an undergraduate, replete in all the dignity of academic cap and gown, has asked himself this question, even before he has received from the hands of his college president that significant scroll which makes him bachelor? And how many fond parents back through the centuries have asked themselves the same question on similar occasions?

The solution which has occurred to many whose station in life does not oblige them to step at once into the hurly-burly of business or the regular routine of a profession has lain in the word, "Travel." "John has been so confined in college for several years," says Mother, "I think it would broaden him to see more of the world." "Quite so," says Father, "an excellent idea. Just the experience he needs." So John starts off upon the Grand Tour.

There have been Grand Tours and Grand Tours. The itinerary has varied in accordance with the homeland of the tourist, the century in which he has lived, and the amount of time at his disposal. Likewise, the method of travel has varied from century to century. Fashion has had a good deal to do with this. For the Grand Tour has always been fashionable, and fashions change.

Consider the young gentleman of Shakespeare's day. Upon going down from Oxford or Cambridge, it was almost taken for granted that he would make the Grand Tour. That is, he would be off to the Continent, attended by a single man-servant or an entire household, according to his rank and inclinations, and spend some months in European travel. He might attend, at Paris, one of those select small academies especially designed for his needs, where one learned to ride, and fence, and dance, and chatter, in the most approved and up-todate manner. Then on to Italy, where letters from his parents probably reached him warning him against the insidious influence of Romanism, and entreating him not to adopt so many of the latest Latin fashions and mannerisms as to make him deserving of the rather opprobrious epithet, "italianate." Eventually, back home by way of Venice, the Alps, Germany and the Netherlands. And behold, the finished product

With the advent of steam navigation and railroads, the Grand Tour was like to become a globe-girdling affair, or for the college graduate of the United States, at least a trip to Europe. The motorcar, in turn, has introduced some attractive variations in this venerable Institution. Its latest form, as evinced by several parties of American youth, is to buy or charter a small sailing ship, to be manned by themselves or with the aid of an experienced seaman or two, and set out on a voyage which will take them across at least one ocean. Where it is possible to make the voyage productive of some sort of research or investigation in a field of particular interest, such as oceanography, so much the better.

What is to be the Grand Tour of the future? Will it be a long flight by airplane or dirigible, perhaps to the polar regions? Or will college graduates, with their genius for doing the unconventional and unexpected, revert to pedestrianism, or ox-carts, or camel caravans, or catamarans?

Editorial Notes

Refuting the charge that the universities of the United States are developing into fashionable country clubs, with study reduced to a minimum, comes the news that 8000 Columbia students are earning a total of \$4,000,000 this summer in 200 kinds of employment. Young men and women who are willing to work for an education often get considerably more than they are primarily after.

In going right out into "nature's laboratory" to study geology "on the ground," University of Montana students are apparently basing their knowledge on the rock.

More than one athlete who tried for the United States Olympic team found not more than an inch separating him from a trip of about 6000

And now Senator George W. Norris of Nebraska insists he does not choose to run.

Lovely growing weather. The corn belt can

let out a hole almost every day now.

"For a Good Apple Year"

By SISLEY HUDDLESTON

"POR a good apple year the year has not been too good, but for a bad apple year the year has not good, but for a bad apple year the year has not been too bad." That is the classical phrase attributed to Norman apple growers. It is heard in a thousand variants. You can never get nearer the facts. Things might have been better, but then they might have been worse. On the positive side, the Norman philosophy is lacking There are no enthusiasms. Superlatives are eschewed Everything is comparative. Good might always be better, and better might always be worse.

The French generally regard the better as the enemy of good. For them it is wiser to take a moderate course, to be satisfied with mediocrity. They recall the fable of the monkey who tried to take too many nuts out of the narrow-necked vase, and whose paw was caught tight. But the Normans always remember that more nuts were in the vase. There is a note of disenchantment in their

On the other hand there might have been no vase and no nuts at all. On this side the Norman philosophy is comforting. So much depends upon the point of view. Naturally, if one sets one's expectations at the highest, one may be disappointed. But if one sets one's expectations relatively low, one may be agreeably surprised. From the standpoint of good years the apple crop is perhaps poor; but from the standpoint of bad years the apple crop is unquestionably gratifying. It would be doleful to say that things might have been better, but it is not uncheering to say they might have been worse. The Normans make a curious blend of their dolefulness and their cheerfulness, but on the balance cheerfulness wins. + + +

In my Norman village I constantly heard the noncommittal reply. The workmen were putting up an elaborate kitchener with incredible complication of pipes to carry hot water from room to room, and were painting and carpentering and generally making my old mill uninhabitable in order to make it habitable

Would they have finished in a week? Surely they were approaching the end? They had already been a month and a half longer than they had led me to believe. Could I rely on them to complete their task by Wednesday?

Why, as to that," said the entrepreneur, blowing up his forge, "as to that, it will certainly be well advanced." "What do you mean by well advanced? Do you mean it will be finished or not?"

"I cannot say it will be finished, and I cannot say it won't be finished. It will be well advanced.

"But you have told me that for more than a month. What am I to think?" "It will be well advanced."

Wordsworth could not induce the child to alter her simple reckoning: "We are seven." I could not induce the entrepreneur to abandon his phrase: "It will be well,

"Well," said the Mayor of the tiny commune, "my advice would be-stay on the spot if you would have the house made ready. They have so much work to do that they rush from one place to another. They do the most urgent jobs. They will never believe that your job is urgent if you do not take up your abode. Then when they see you camping in confusion they will take pity on you. I thanked him for his counsel. "Yours must be a happy

village if there is more than enough work for everybody. He shook his head. "For a village where there is plenty of work there is not too much cause of complaint," he said.

The sun shone on the red roofs, irregular, old, rainsoaked and sunburnt. The hills on the other side of the river were green enameled. Their meadows were rich and shining. Here and there a cloud, white in the sky, cast deep shadows on the grass. The trees that crowned the slopes showed every hue from pale gold to black. The orchards on the right were heavy with fruit. For a village where nature was both generous and charming, where there was employment for all, there was little reason for grumbling.

In the village is one shop. It stands opposite the schoolhouse, which is next door to the church, which touches the meeting place of the village council. Everything from soap to postage stamps is sold in the shop. It is also the village inn.

I explained our situation to the shopkeeper. We wanted to stay, but could do no cooking. We could sleep in our own beds, but we were not prepared to walk several miles several times a day to eat in the nearest restaurant. Would he not be good enough to provide us with food for a few

He gazed out of his doorway across the village green where young dogs were gamboling. His manner was friendly, but his words were equivocal. He would say neither yes nor no. His wife had gone to the market town. She would be back late in the evening. Sometimes she gave meals, sometimes she did not. It depended. It was not in their regular line of business. They were not properly equipped. Provisions were not easy to obtain. Vegetables that year were-well, he would not say scarce, but less plentiful than he had known them.

4 4 4 We were anxious to know whether we could count on meals. "Do you suppose she will agree?"

He contemplated the church and spoke slowly. "If she will, why then she will. If she won't, why then she won't." That should have sufficed for us. But we went on: "The simpler the meals the better. We wouldn't like to put you to unnecessary trouble.

"There will be no trouble. It will be a pleasure. But then it may not be convenient."

And with such an answer we had to content ourselves, though we were sure that the answer was yes. There is an old joke about ambassadors. Perhaps you know it. If an ambassador says yes, he means perhaps; and if he says perhaps, he means no; and if he says no, he is no ambassador. I am certain that the contrary applies to the Norman. If he says no (though it is difficult to imagine his use of such an extreme expression) he means perhaps. If he says perhaps (which is a word after his own heart) he means yes. If he says yes (now we are pretending what is impossible) he is no Norman.

You have, of course, fulfilled all formalities?" we asked the man who connected the water-main pipe with our mill. "On that you can be tranquil," was the reply. It was useless to insist. The most experienced lawyer could not have bullied him into saying yes or no. His favorite phrase was: "Vous pouvez être tranquille." Nothing would shift him from that. "You may be tranquil." Attach any sense

you please to this assurance. + + + We took it that formalities were fulfilled. But presently a pompous person appeared. "I am a councilor of the

village," he announced. "I am specially delegated to inspect and report on the usage of water. We welcomed him with the solemnity befitting his important office.

"It is my duty to inform you that there does not appear to have been an application in due form for permission to use the village water. Understand, I do not assert that such an application has not been made, but there is no record of its reception. Rules are rules, and I. as councilor, specially delegated to the service of the water supply-

"But how could the water main have been tapped without authorization?"

"Oh, the workers of the village take liberties. But it is your affair, not theirs. In my capacity of councilor-delegate I am obliged—'

A small matter which was soon put right, but I learned, in consequence, to beware of such phrases as "Vous pouvez

In the morning the sun peeped in at the window and the birds twittered. There was a knock at the great outer doors and there entered a little girl bearing a dish of cherries and a bowl of the creamiest milk. "Oh, how delicious!" we cried. "Who has sent you

with these?" "Mamma thought you might like milk and cherries for

breakfast and so she sent me with them. "How kind! And what big cherries!"

She had not seen more than eight summers, but she had learned the talk of the country. "They are big enough cherries," she said, "for a year in which the cherries are not big, but they are small cherries for a year of big

What Farming Means

FIFTY-TWO years of studies on America's oldest soil experiment plots, the Morrow plots at the college of agriculture, University of Illinois, have fashioned this patch of ground into "a monument marking the tragedy of soil exhaustion," according to a bulletin. The plots were named after George E. Morrow, professor

of agriculture from 1876 to 1894. Three different systems of cropping, with and without fertilization, have been followed. On one of the plots corn has been grown continuously since the project was started, on the second corn and oats have been rotated for the entire period. on the third plot, corn, oats and clover have been rotated for the last twenty-four years. Results from these three cropping systems without fertilizers are presented from the twelfth year through 1926, or for thirty-nine Results for the twenty-three years, from 1904 to 1926, are given for the same cropping systems with applications of manure, limestone and phosphate.

The continuous growing of corn without soil treatment fell short by \$6.33 an acre of giving any annual net return between 1904 and 1926. Even with soil treatment the loss was \$1.95 an acre.

With corn and oats rotation, there was an annual net loss of \$2.89 an acre when no soil treatment was used, but a net return of \$3.81 for each acre when the land was treated with manure, limestone and phosphate. Without soil treatment, the rotation of corn, oats and clover paid an annual net return of \$2.09 an acre. With

soil treatment, this same rotation paid \$6.40 an acre. Valued on the basis of what it will produce, the continuous corn land is worth \$73 an acre where no soil treatment has been used and \$161 an acre where manure, limestone and phosphate have been applied. The cornoats land is worth \$142 an acre where untreated and \$276 an acre where treated. The corn-oats-clover land is worth \$242 an acre where untreated and \$328 an acre where treated.—Lafayette (Ind.) Journal and Courier.

Learn From Your Mistakes

EARN from your mistakes, but do not cry over them. He who never makes a mistake never makes anything. The trouble with the man who never makes a mistake is that he does not know a mistake when he makes one. Wise men make mistakes; fools continue to make them .- Milwaukee Journal.

Liberty

THE consummation of human liberty is not that which makes men free from other men, but free from themmakes men free from other men, but free from themselves. Until they realize this, they may still fight like lions, conquer their foes, and yet be enslaved by fears and sins and false thinking. For though they are, as Paul said, "free born," because not born of the flesh, but of the will of God, as long as they believe that they are imprisoned in the flesh, they will pay the penalty of that belief in servitude to the flesh, which is a hard master. As long as they look to the body for health and happiness, instead of to "the spirit that quickeneth," they will never find freedom from disease and sin, which are conditions of thought. Yet it is humanity's necessity and ceaseless desire to find that freedom. Though the flesh has its specialists for almost every organ and disease; . . . yet its infirmities and frailties increase, and hospitals, sanitariums, and prisons grow in demand and

This shows how the flesh leans toward its fears and desires and can never find freedom by following in its own footsteps. The science of health can no more be established by taking thought for the body than the

science of numbers can be learned by dwelling on the errors made in its study. For the greatest Physician of the world said: "Take no thought . . . for the body," because he knew that health was primarily a spiritual and not a physical condition. He proved this by healing the sick and casting out evils by what he called "the Spirit of God"; by exercising the power of Mind over the flesh, which is no real part of man's identity. Thus the great Physician, who made no mistakes to bury out of sight, gave humanity its choice of liberty or death, of freedom from the flesh and all its claims of sickness and sin, or of death under its dominion. It is still debating that choice, after two thousand years of stubborn doubt and tragic discussion. And it can make no true progress until it decides, . . . for liberty.-New Orleans States.

Joy That Abides

AMENTATIONS having as their theme the transitoriness of pleasure are seldom justified. When pleasure is based merely on the satisfaction of desire it is a happy thing that it cannot endure, and that the very effort to continue it produces satiety and disgust. source of true enjoyment is found in that which is deeper and more enduring than mere desire. It produces a conscious interior harmony which abides long after the occasions of the pleasures of sense have passed away.

Berkeley in his Alciphron writes of the pleasures of reason, imagination, and sense; it is as these are combined that a man is able to enjoy present pleasure while he stores up memories which provide constant enjoyment in the future. For this reason those sources of pleasure are most enduring that come from the exercise of a man's spiritual faculties, and enable him to participate in something of the joys of the supernatural life. They abide because they are derived from the boundless resources of Him at whose right hand there are pleasures for evermore.-The (London)

Safeguarding Children's Movies in Japan TO THE CHRISTIAN SCIENCE MONITOR:

I was interested to read the article in The Monitor of July 2 entitled, "Film Libraries in Japan Will Protect Children From Harmful Motion Pictures," and feel that this truly progressive step must call forth deep appreciation from thinking people, the world over.

Fifteen years ago, the question first presented itself to me as to what would be the effect of motion pictures upon the coming generation. I wondered what th people would be like, when from their early years they had witnessed exhibitions of many human problems, the existence of which I, a traveler, had not known before the age of twenty years. Many instances of the answer to this question may be seen.

Children's reading is beautifully directed and guarded by the libraries. But these same children are often at liberty to go to the movies, week after week, and fill their thoughts with a jumble of false values, unnatural

motives, low impulses and so forth.

All honor to Japan for taking such a glorious step toward the preservation of the ideals of the future (Mrs.) INEZ BARLOW BROWN. New York, N. Y.
